OSAWA & COMPANY

WONDER-GUN

Wonder-Gun is ...

a new type of air gun that uses compressed air to blow off, suction, and to transfer materials, and is used widely in many industries.

The products marked ○ adopt the special jet system, which is a way of bringing out the full power of the compressed air. It works by injecting a large quantity of secondary air in angle to the main air jet and this causes the main air jet to spiral powerfully.

There are no worries that materials get clogged inside of Wonder-gun since it doesn't have any interior restrictions.

★ Wonder-Gun Hand Held Model W101 W301

Three in One (Blow off, Suction, Transferring)!

Model	Specifications			
	Length	Minimum ID	Nozzle Orifice	Weight
W101	144	φ 22	φ 1.4×6holes	310g
W301	142	φ 11	φ 1.4×3holes	260g

We offer Powerful version for this model.

For Blow-off

Place the suction nozzle as in the left drawing 1. Then start operation. A large amount of air goes into the gun from side (B) together with the compressed air, and a strong air flow is blasted in spirals from the holes on the nozzle.

For Suction

Place the suction nozzle as in the left drawing 2. Then start operation. A large amount of air goes into the gun from side (A) together with the compressed air, and a strong air flow is blasted in spirals from the holes on the nozzle. In this operation, Wonder-gun can be used as a cleaner.

SILENT-CLEANER

● Jet Ejector

Jet Ejector, the heart of the Silent Cleaner, is the device that creates strong suction. There are no rotating parts so no breakdowns.

● Silencer

The silencer keeps exhaust sound low
- 60dB with SC30-32S.

● Safety Valve

Safety valve prevents sudden increase of vacuum and breakage of tank, which is caused by air pressure rise or hose obstruction.

● Inner Filter

Inside of Silencer, is glass-wool-made filter. This filter prevents dust from going outside. Please order "fine dust filter" for fine dust.

● Powerful Models

All Model can be custom ordered as Powerful models. Please put "G" at the end of model when you order.

Mini Porter Cyclone

MP-38CF12 (PAT.)

*Can be Connected to ANY Vacuum cleaner!!
Easy to Move!!*

Centrifugal Action of Mini Porter Cyclone

TROUBLES IN HANDLING FINE POWDER??

Mini Porter Cyclone separates powder and air by centrifugal force and sheer dead weight - with no filters. Eventually, the powder is dropped into a tank and accumulates while the air flows into the suction machine. When handling flour, for example, the efficiency is almost 100%. This function reduces maintenance and helps to save expense and time.
